BEEFMASTERS

Breeding Productive
Profitable Cattle

Mike & Rhonda Collier

Welcome to the Collier Farms Advantage Sale!

After much planning, the **2012 Advantage Sale** will be held on **April 14th**. I couldn't be more excited and pleased to have your interest in our **Beefmaster Cattle** offering! We thank you. The main objectives of the advantage sale is to provide you, **our valued customer**, with a constant and dependable source of seedstock genetics that will help you to **improve the productivity and profitability** of your cattle operation.

On behalf of Collier Farms and the **Advantage producers**, we want you to know that we are totally committed to customer satisfaction. We want the cattle you purchase from the Advantage to make your operation **profitable** by adding **performance driven genetics** to your program.

The quality standard for this offering is **front pasture**. Only cattle that would make top end for each of our own operations in terms of performance and phenotype and genetic predictability are selected for the Advantage Sale. Please don't take my word for it. Come to Giddings on April 13th and 14th and see for yourself. We will have the cattle ready for viewing Thursday afternoon, all day Friday and before the sale Saturday morning.

Friday night we will have a dinner on the ranch at our "Homestead Division" sale facility in Giddings. We look forward to having you as our guest. Come to Giddings and take **"Advantage"** of us!

Maternal Reference

*Tiger Baby

Sire: **Painted Tiger (**Painted Warrior x **CD 1-126)
Dam: **Thompson 3024 (**King Cotton x **Lady Phantom)

Tiger Baby is one of the true maternal greats currently found in the breed. She has consistently proven that she can produce top tier seed-stock genetics when mated with a variety of bulls from across many different breeding programs and styles. At over 15 years of age the combination of Painted Tiger and King Cotton genetics found in Tiger Baby continues to verify the merit of that mating and their value toward creating modern Beefmaster cattle that will carry the industry successfully into the future. Dam of lot 23.

**Penelope and Petunia

Sire: **Painted Tiger (**Painted Warrior x **CD 1-126)
Dam: Lady Victoria (**Spartacus x Victoria's Secret)

Brought back together into the Collier Farms E.T. program, flush-mates Penelope and Petunia exemplify everything to be expected from Painted Tiger and Lady Victoria. Combining Painted Tiger with the legendary 293 cow family is a proven mating that has created some of the most impressive and productive cattle in the breed. They have produced several high selling offspring by a variety of sires and the potential to mate well with countless others. Study the length of body, depth, thickness, and great fronts they put on their calves. Dams of lots 1A, 1B, 24.

**Bengal Baby

Sire: **Painted Tiger (**Painted Warrior x **CD 1-126)
Dam: Cathy's Treasure (**Infinity x **Cathy Lee)

Even amongst an impressive set of high caliber females, Bengal Baby has redefined the level of excellence for which all other donors within the Collier Farms herd will be measured. At a very young age, this feminine, yet powerful matriarch has produced some of the best donor and herd sire prospects available on the market and continues to impress with each new set of calves. Females like Bengal Baby will not only be the future of this program, but the coming direction of the breed. Dam of lot 72.

Red Farrah's Dream

Sire: **Spartacus (**Gladiator x **Dreamlady)
Dam: Red Farrah (**Red Sugar x **Farrah Lady)

As one of the most complete heifers we had ever seen, Red Farrah's Dream was purchased with high hopes of creating some of the best Beefmaster cattle ever produced. Since the time her first natural calf hit the ground and subsequent embryo offspring, those expectations were surpassed. Red Farrah's Dream has the conformational correctness, ample muscling, performance traits, and proven pedigree to become one of the next great Beefmaster females. Dam of lot 36.

GF

Maternal Reference

****Tiger Whisper**

Sire: **Painted Tiger (**Painted Warrior x **CD 1-126)
Dam: Dos Sombreros 19/7 (**Spartacus x **Lady Jacqueline)

Like many of the Painted Tiger donors found within the Collier Farms program, Tiger Whisper possesses the long flowing lines, clean front, and thick rear quarter essential to true donor females. Through her production, it is evident that Tiger Whisper will consistently produce the gorgeous feminine females purebred breeders desire and strong hardy herd bulls the commercial industry demands. This impressive donor female continues her legacy of production by mating well with some of the breed's top herd-sires like Logan and Classic Cotton. Dam of lots 33A & B.

****Tiger's Cotton**

Sire: **Painted Tiger (**Painted Warrior x **CD 1-126)
Dam: Thompson 3674 (Cotton Jubilee x **Zipperer 853)

Painted Tiger on King Cotton worked every time and this outstanding donor female is no exception. This proven matriarch is very long bodied, moderate hip height, and thick made. She is the dam of our Mesquite Red herd sire and several extra class females within the Collier program. This cow was still producing live calves and embryos to the age of 17. This is the kind of production and longevity serious programs need. Dam of lots 32, 53.

Tiger Joy

Sire: **Painted Tiger (**Painted Warrior x **CD 1-126)
Dam: **Lightning 800 (**King Cotton x **Lightning 511)

Arguably one of the most prolific and profitable donors within the Collier Farms breeding program is Tiger Joy. Now deceased, this perfectly designed, moderate framed cow produced both live calves and an abundance of embryos up to the age of 16 years. She was known for her ability to produce dark red individuals with ample bone, bladed underlines, and beautiful teat structure. Some of her daughters are now donors within the Collier Farms herd, where they will continue the legacy of Tiger Joy. Dam of lots 14, 25, 44A & B.

***Denim Phantom**

Sire: MacLaughlin 48/5 (**Levi x MacLaughlin 9/9)
Dam: AW 25/6 (JP3 28/2 x Fisher 2/12)

Denim Phantom is a super deep made cow with extra rib capacity, a thick square rear, and beautifully extended front end. This cow was brought into the donor herd based solely on proven production. Good udders, bladed underlines, and easy fleshing ability are evident in her progeny. One of the most impressive herd sires produced at Collier Farms is a son of Denim Phantom. Be watching for more to come from this great cow line. Dam of lots 10, 11.

****Miss Pepper Jack**

Sire: **Black Jack 21 (**Black Magic x Miss Scarlet)
Dam: 4M 113-3 (Sgt. Pepper x **Houston daughter)

Long sharp lines, deep broody body, and gorgeous udder just begin to describe the conformational correctness and attractiveness of Miss Pepper Jack. Not only is this young donor female making her mark within the Collier Farms herd, she has recently produced some of the highest performing and selling cattle now in use amongst other purebred herds in the breed. Dam of lots 3, 73.

*****Dusty Cotton**

Sire: ***Classic Cotton (**Levi x ***McGrede 5/39)
Dam: Miss Dusty (**Painted Tiger x **Lady Jacqueline)

With breed legends like Classic Cotton, Painted Tiger, and Lady Jacqueline, this donor female was sure to be a top producer; and she has never let us down. Dusty Cotton provides great lines, a long stretch, and impressive design to her offspring while maintaining performance and muscling attributes. This highly productive female produces large numbers of high quality embryos which in turn have become some of the most attractive cattle at Collier Farms. Dam of lot 26.

Collier Farms Advantage Program

The **Collier Farms Advantage Program** is a simple yet exciting new customer dedication program designed to enhance the potential marketing opportunities for breeders using Collier Farms genetics. The program will feature exclusive sales opportunities like the Advantage Sale, buy-back offers, cooperative performance testing through bull development programs and gain tests, as well as marketing assistance and genetic promotion of Collier Farms based cattle.

The central focus of the program is to assist Beefmaster breeders in the endeavor of realizing the true potential of their product. Because we at Collier Farms understand the many production and marketing challenges facing producers of all sizes, this program was created to provide a variety of marketing avenues, cattle development options, and product support essential to profitability and overall success.

The underlying beauty behind the **Collier Farms Advantage Program** is its simplicity and ease of use. From the beginning, **NO** exclusive participation levels or highly regulatory mandates were created. It is as basic as implementing ANY Collier Farms bred animal into your program. Simply put, any animal a breeder produces from a Collier Farms bred sire or dam qualifies for the Advantage Program. All calves from Collier Farms bulls, cows, semen, or embryos have met the essential requirements of the program. There are **NO** membership fees or hidden costs.

Once a breeder has a qualified animal there are no limits or restrictions as to when, where, or how they choose to market **THEIR** product. The **Advantage Program** only offers additional avenues or options in which breeders can take **ADVANTAGE**. Currently, producers can place bull calves in the Collier Farms performance gain test and sale, make plans to reserve a place in the upcoming Advantage Female Sales, or inquire about the buy-back offers available.

For more information about the Advantage Program or Collier Farms genetics contact us at **www.collierfarmsbeefmasters.com** or call the ranch at (979) 251-4175.

MORE BIDS. MORE PROFIT.

Bid and Buy live using the industry's best real time interactive online auction service.

www.advancedvideoauctions.com

Advanced Video Auctions (AVA) provides live video auctions, webinars, and many other marketing and meeting presentations in real time over the internet.

The **AVA** system was created and developed especially for the marketing and promotion of livestock and is well proven to provide a unique presentation for various livestock events via the internet.

Videos, still images and detailed information on each of the lots offered are available prior to the sale and may be viewed anytime at **www.AdvancedVideoAuctions.com**. You do not need a username or password in order to preview the sale offering prior to the sale, but we do encourage you to **Register Early** for the sale to obtain your username and password that you will be able to use on the **AVA** system for each sale where you desire to become a buyer.

On sale day you will log on with your username and password and will then be able to view the auction broadcasted with either live streaming video or pre-recorded video of the lots and on some events, you will see both. In addition, the **AVA** system provides **live streaming audio** from the sale site so you don't miss any part of the auction action, hearing the auctioneer and other comments announced. Plus, you can **privately chat** in real time with the on-site bid administrator.

Please go to www.AdvancedVideoAuctions.com to register for the sale or event. You only have to register once for all events held! Please try to register prior to sale or event day. Also, please note that payment terms are unique and specific for each sale. Please review any of the sale terms ahead of time and if you have any questions, you can contact the sale personnel designated for that auction.

Optimal Connection Speed: DSL, Cable internet or any Broadband internet connection. Minimum download speed of 512 is recommended.

Computer Requirements: Most any computer 6 years old or younger with the latest versions of Internet Browsers: Internet Explorer or Firefox with the Adobe Flash player installed are recommended. You can download the current version of the Flash player at www.adobe.com

Best Viewing: Set your computer screen to at least 1024 x 768 pixels.

Sale Day Help Desk: Please call 888-354-0181 with any technical questions on sale day.

Dear Beefmaster Breeder,

Collier Farms Advantage Program is an open invitation to everyone to join their breeding program and marketing plan. Now for the second time you will be offered the fruits of all their labors in the Collier Farms Beefmasters Advantage Sale to be held April 14th at the Homestead Ranch Sale Facility in Giddings, Texas.

Collier Farms has built a reputation for breeding productive and profitable Beefmaster cattle and established a tradition of marketing that same product. Collier Farms' breeding program philosophy of producing a Beefmaster product that works for anyone in any environment has established them as an annual source for superior Beefmaster seedstock. With that accomplishment and never ending drive to improve, the Collier Farms Advantage Sale Program offers everyone an entry into a better Beefmaster and an established successful marketplace.

Logan, Fusion, Tabasco, and their sons lead an impressive sale offering of superior individuals with the extra quality and predictability you require for true breeding success. Vision will make his debut, which will be impressive, and provide a tremendous opportunity to add Penelope to your maternal breeding arsenal. The Logan daughters out of Penelope, Tiger Baby and other proven cow families, which have the extra maternal strength to help you become a more successful Beefmaster breeder, only make this opportunity stronger. These, combined with the other tremendous individuals in every category exhibiting the breed character and performance you desire, give you the tools to create your own successful Beefmaster business. The Advantage consignors have matched the quality of Collier Farms and with the youth represented throughout the sale offering and the special semen and embryo opportunities, this sale is one you must attend to fully appreciate.

Collier Farms and the Advantage consignors are built around the guarantee of your satisfaction and they have done their job to gather the proper product for you to be profitable. Now it is up to you to get involved with the Collier Farms Advantage Sale. We ask that you make plans now to join us Friday to evaluate the sale offering in the traps and enjoy a tremendous supper. We do have a sale offering DVD available and the sale will be shown live on the Internet at advancedvideoauctions.com.

If you have any questions or need any assistance of any kind do not hesitate to contact myself, co-sale manager Anthony Mihalski, sale consultant Mike Green or Collier Farms. We all stand at the ready to help you become profitable in your Beefmaster breeding program with your purchase at the Collier Farms Beefmaster Advantage Sale.

See you in Giddings!

Bruce Robbins

Dear Beefmaster Breeders and Friends,

Please join us for the Collier Farms Advantage Sale Saturday, April 14th 2012 for a True Seedstock offering of Beefmaster Cattle.

The Collier Farms herd and the Advantage Program breeders have built this herd around tried, measured and proven cattle with the very best genetics in the industry!

Utilizing every breed improvement tool available with the six essentials as a foundation through a demanding AI & Embryo program, Collier Farms has identified the largest set of super Donor females in the breed. These donors mated with the Elite Sires of the breed and have produced this powerful set of seedstock Beefmasters.

Expect the very best! With Sires and Dams that are respected and sought after throughout the breed. Sires such as Logan, Vision, Fusion, Tabasco, Maverick, Logans Legacy, French Connection, Tabasco's Legacy, Secret Agent, Classic Cotton, Cavalier and Painted Tiger. Super Dams such as Tiger Baby, Penelope, Petunia, QT Pie, Infinite Madam, Denim Phantom, Harmony, Tiger Joy, Tiger Whisper and Red Farrah's Dream.

Collier Farm's success is no accident and it's no secret that they have excelled in every major event in the Beefmaster industry. Collier Farms breeding determination has been successful. Their slogan is "Breeding Productive, Profitable Cattle," with emphasis on longevity which increases profitability.

Take advantage of this program and this sale to make your program a success. Every animal in this sale was selected with pride to represent this breeding program. It is based on honesty and integrity with a no-question asked guarantee!

Sincerely,

Anthony Mihalski

**TERMS AND CONDITIONS OF SALE
ADOPTED BY BEEFMASTER BREEDERS UNITED
FOR BBU APPROVED SALES
Effective September 10, 2010**

THE FOLLOWING TERMS ARE APPLICABLE TO ALL TRANSACTIONS IN BBU APPROVED SALES:

1. **BIDDING:** Each animal will be sold to the highest bidder without reserve.
2. **BIDDING DISPUTE:** The Auctioneer in charge will settle any dispute as to bids, and his decision on such matters shall be final.
3. **TERMS:** Terms of the sale are cash due upon sale, unless prior credit arrangements for the sale have been agreed upon in writing between the Buyer and Seller, in which event, the terms of the written credit arrangement between the Buyer and Seller for the sale shall prevail. The failure of a member buyer to pay the appropriate party the sale amounts when due may constitute a cause for exclusion from BBU pursuant to Article I, section 9 of the By Laws of BBU.
4. **PURCHASER'S RISK:** Each animal becomes the risk of the purchaser as soon as the auctioneer declares it sold.
5. **CERTIFICATE OF BREEDING AND/OR TRANSFERS:** All required paperwork will be transferred to the buyer at the seller's expense, upon settlement.
6. **HEALTH:** All animals will have appropriate certificates of veterinary inspection for travel to the sale site and will to the best of the seller's knowledge be eligible for interstate shipment, however, buyers need to be aware of their individual resident state's requirements for shipment of cattle. Any and all testing will have been completed within thirty (30) days of the sale date.
7. **ANNOUNCEMENTS:** Any changes in information of any kind will be announced from the auction box and such announcements shall take precedence.
8. **BREEDING GUARANTEES:** a) **FEMALES: OPEN AND/OR EXPOSED FEMALES:** Females younger than twenty-four (24) months of age can be sold as open. Open females are so guaranteed. Any female is considered a breeder if she is certified to be pregnant by a licensed veterinarian at the time of sale and/or has a nursing calf at side. Cows (including donor cows) with calves at side six (6) months or older must be certified to be pregnant by a licensed veterinarian. b) **SAFE IN CALF FEMALES** have been examined by a competent veterinarian and are so guaranteed. c) **BULLS:** Bulls eighteen (18) months or older are guaranteed to have passed a Bull Breeding Soundness Evaluation (BSE) and to have been certified a satisfactory potential breeder by a licensed veterinarian within forty-five (45) days prior to sale date. The results of the Breeding Soundness Evaluation (BSE) must be reported on a fully completed official form and attached to the health papers required for the sale.
9. **DISCLOSURE OF PRIOR PROCEDURES:** If known to the seller, there must be a disclosure in the current sale catalog or from the box of any circumcision or other surgical alteration of any underline of any male or female and of any single egg or super-ovulation flush of any female sold in a BBU Approved Sale.
10. **INHERITED DEFORMITIES GUARANTEE:** All bred females are guaranteed not to produce a calf with an inherited deformity occurring in Bovine for a period of nine months following date of sale.
11. **REPRESENTATIONS AND GUARANTEES:** All representations and guarantees, whether set forth in sale catalogs, these Terms and Conditions of Sale or otherwise, are solely those of seller and are not those of BBU. Except for the assurances set forth in the Approved Sales Agreement that an animal does not exhibit a genetic defect and that its registry information is consistent with the information in BBU's records, BBU makes no representations, warranties, guaranties or assurances whatsoever.
12. **RIGHTS AND OBLIGATIONS:** The above terms and conditions of sale shall constitute a contract between buyer and seller of each animal and shall be equally binding upon both. Each sale or resale of an animal constitutes a separate transaction. Neither BBU, the sale manager, nor any other person connected with the management of the sales assumes any liability, legal or otherwise, for any subsequent resale of an animal.
13. **REMEDIES:** a) **OPEN AND/OR EXPOSED FEMALES** are guaranteed to be breeders by twenty-four (24) months of age except in cases of animals purchased and then fitted for show or administered any super ovulation drug. In cases of animals fitted for show or administered any super ovulation drug after purchase, the breeding guarantees, if any, shall be such as agreed upon between buyer and seller. All claims for a refund must be made in writing to the seller within six (6) months after the animal reaches twenty-four (24) months of age. Open females are so guaranteed. If within sixty (60) days after the sale date, a female sold as "open" proves to be with calf, the buyer may return the female to the farm of the seller, provided the female is in good condition and in compliance with the health requirements of the seller's state, and receive refund of the full purchase price. The acceptance of the refund of the full purchase price shall in any case be deemed full satisfaction and settlement of the matter. The buyer's failure to notify the seller within sixty (60) days from the date of sale and to make the election as hereinabove provided shall relieve and absolve the seller of any duty, obligation or liability to the buyer regarding the purchase of said female. The seller and buyer shall bear equally all reasonable and necessary transportation expenses that are incurred in returning the animal to seller. b) **SAFE IN CALF FEMALES** are guaranteed to have been examined by a licensed veterinarian. If within thirty (30) days after sale date, a female sold as "safe in calf" proves not to be in calf, the buyer may immediately request that the female receive service from the bull previously used, if available, or return the female to the farm of the seller, provided the female is in good condition and in compliance with the health requirements of the seller's state, for a refund of the full purchase price. The acceptance of the refund of the full purchase price shall in any case be deemed full satisfaction and settlement of the matter. The buyer's failure to notify the seller within thirty (30) days from the sale date and to make the election as hereinabove provided shall relieve and absolve to the seller of any duty, obligation or liability to the buyer regarding the purchase of said female. The seller and buyer shall bear equally all reasonable and necessary transportation expenses that are incurred in returning the animal to seller. c) **FLUSHES AND TIME REQUIREMENTS:** A flush consists of all viable embryos, transferred or frozen, received from a female as the result of the administration of any super ovulation drug. The sale of a flush or resulting pregnancies must specify in the sale catalog the number of pregnancies guaranteed and the disposition of any other pregnancies resulting from the flush, the disposition of any frozen embryos resulting from the flush and any additional charge for the recipient cows. The maximum time for the delivery of the guaranteed results must be specified along with a payment schedule. Non-delivery or only partial delivery by the specified time by the seller will result in a pro-rata refund of all monies paid by the buyer for such flush or pregnancies not delivered. d) **PREGNANCY AND/OR PREGNANT RECIPIENT COW:** Pregnancy and/or pregnant recipient cow is a cow of any breed that is carrying a pregnancy (guaranteed to have been examined by a licensed veterinarian as safe in calf) as the result of a flush as so stated on the certification of embryo transplant form. Such pregnancy and/or pregnant recipient cow is guaranteed to be carrying the embryo pregnancy so stated and if found not safe in calf by a licensed veterinarian within thirty (30) days of delivery of the recipient cow to the buyer, the buyer will have the same remedies as set forth in clause b) for the safe in calf females. The amount bid by the buyer for the individual pregnancy and/or pregnant recipient cow offered at a sale will be inclusive of the recipient cow. A pregnancy and/or pregnant recipient cow should be available at the sale site; however, if not available it must be delivered to the buyer, at the seller's expense, within thirty (30) days of the sale with the necessary health papers sufficient for delivery to the buyer. e) **CLONES:** Only BBU replication cell-cloned animals shall be eligible for registration and eligible to sell in BBU Voluntary Approved Sales. Genetically modified animals shall not be eligible for registration and cannot sell in BBU Approved Sales. Cloned animals shall be guaranteed by the seller to be breeders under the same terms of the agreement for females and bulls. Any additional guarantees with respect to clones shall be by separate agreement between buyer and seller. f) **BULLS:** If within one-hundred twenty (120) days from the date of sale, the bull has failed to pass a Breeding Soundness Evaluation ("BSE") certified by a licensed veterinarian, buyer must send seller written notification of the failure of the test within one-hundred and twenty (120) days from the date of sale and include the BSE test results. Within sixty (60) days after sellers notification of the failed BSE test, buyer and seller shall identify a mutually agreeable licensed veterinarian or technician certified by a licensed veterinarian to perform another BSE on the bull at the buyer's expense. The results of the test shall be deemed final and conclusive of this matter and binding on buyer and seller. If, in the opinion of said veterinarian or technician, the bull is unable to pass a BSE and be confirmed a satisfactory potential breeder, he shall so certify in writing to the seller and the buyer which shall include the official form used by the Society of Theriogenology or the official BBU Breeding Soundness Evaluation form. In such event the buyer may return the bull to the farm of seller, provided the bull is in good condition and in compliance with the health requirements of the seller's state, for a refund of the full purchase price. The acceptance of the refund of the full purchase price shall in any case be deemed full satisfaction and settlement of the matter. The seller and buyer shall bear equally all reasonable and necessary transportation expenses that are incurred in returning the animal to seller. A listing of industry standards for Scrotal Circumferences for bulls at various ages will be printed in the sale catalog. Satellites, Marketing Groups, or individuals may specify additional guarantees.

**Beefmaster
Breeders
United**

Voluntary Classification Guidelines:

Cattle are visually inspected by a BBU field representative for desirable traits. Each animal is classified according to BBU's Standards of Excellence.

Any bull or female in the "U" category will be so designated on the BBU Certificate of Breeding along with the date and initials of the BBU field representative. To be presented for a "U" classification, males and female must be a minimum of 8 months with no upper age limit. Classification of Certified Beefmaster cattle is \$5.00 per head or \$350.00 per stop, whichever is greater.

Any bull or female in the "X" category will be removed from the registry by BBU's office and so noted by correspondence to the member. BBU will not charge the member a classification fee for an "X" animal.

Bulls must have a yearling scrotal measurement (taken between 320-410 days of age) of at least 30 cm to meet the "U" qualification. A measurement of 34 cm is the objective.

All cattle presented for classification must have permanent identification and must be certified or an application for certification must be presented to the field representative.

To receive a number score all animals must have a "U" classification.

All animals (male and female) aged 13 months and up may be presented for "U" classification and number scores for conformation and underline, with the stipulation that if the animal is seen later in a BBU Approved or Sanctioned Sale it is subject to reclassification by the BBU field service representative at the sale (at no charge).

Scrotal Circumference Scores:

SCORE	AGE		
	15-20 Mo. Old	21-30 Mo. Old	Over 30 Mo. Old
Very Good	More than 37 cm.	More than 39 cm.	More than 40 cm.
Good	31-37 cm.	32-39 cm.	33-40 cm.
Poor	Less than 31 cm.	Less than 32 cm.	Less than 33 cm.

**BBU's Mission is to enhance breeder's ability to raise
and promote cattle based upon the founding "Six Essentials:"
Disposition, Fertility, Weight, Conformation, Hardiness, Milk Production.**

Logan and Petunia are as proven a mating as can be found in the Collier Farms program. Petunia is known to produce the extra rib capacity and big hip that is evident in both of these identical flush mate heifers. Study the front ends, perfect leg set, and powerful performance data in these open donor prospects. This is the kind of top end genetics serious breeders need in their herds.

Just like the A heifer, 1B has all the power and volume breeders could want with the added benefit of a pedigree that's second to none. Study the EPDS, individual weight performance, and ultrasound carcass data and the genetic merit of these individuals becomes evident. Logan and Petunia never miss, don't let this individual slip by. It is a pick and we may only sell one!

After much debate over the best way to showcase these amazing Vision daughters, we decided to let the buyers decide by placing these sisters together as one big pick. Every heifer in the pick brings a little different package to the offering, yet remains uniform in phenotype and genetic consistency. There is no wrong pick here, only the pick that best suits each individual program. The A heifer starts the group out with a super complete individual that displays extra depth of body, muscling, and scan data with a feminine front and superior maternal genetics.

The same quality and consistency seen over and over is evident in 2C. The extra offered here lies in the bottom side. CF 76/5 is a beautiful young cow in the middle of here productive life. She exhibits a perfect udder and comes from a long line of females known for their longevity. L 183-5 was a highly productive cow that produced a natural calf every year until the age of 16. Don't overlook the big ribeye measure with a REA/cwt of 1.37.

Take a long look at this little doll. CF 659/1 puts together all the style and class a breeder could want with plenty of muscling and good IMF. Her dam has been in the program since an open heifer and consistently produces some of the best calves of the crop. She has solid numbers across the chart and all the phenotypic traits one could ask for.

Vision daughters are hard to miss and this one is hard to let go. Not only does CF 660/1 bring in the quality and performance expected from Vision, but also brings in one of the most proven cow family lines in the Collier program. Tabasco on Jungle Honey Bear was one of the first embryo matings we produced at Collier Farms because of the superior maternal abilities. Jungle Ranger daughters don't miss and this little Vision daughter is sure to carry on that tradition.

This Vision daughter could easily be the most visually impressive and stylish heifer of the pick. Look at the extra correct lines, leg-set and ease of travel. She has plenty of bone and hock, yet maintains all the femininity needed for a productive mama cow. Proof of this lies in her maternal pedigrees, Tabasco on Lady Legacy produced some outstanding females including the high selling female in the first Legacy sale. From performance to pedigree, its all here.

CF 750/1 is just another repeat verse of this Vision song. Study the correctness and classy front on this beautiful young female. She is out of a highly proven cow that has calved on time every year at Collier Farms and still has a great udder at ten years of age. If you are serious about carcass performance this heifer had a massive IMF of 4.46 and a big REA/cwt of 1.35. Here is a total balanced package that can push your program up to the next level.

Besides being a very attractive individual by a very productive sire, CF 548/1 has a well kept secret in her maternal pedigree. Her maternal granddam, 7C 450, was a very prolific donor in the Collier Farms program until the age of 17. At 17 years of age, 450, was still one of the prettiest cows I've ever seen and had an udder like a first calf cow. Sir Charles was by Levi and Miss Gladys making him a maternal brother to Red Tiger and Dunkin 150 was a Painted Tiger daughter. Combining Vision with the 450 cow is a must have for serious breeders.

Logan on Miss Pepper Jack is one of the most consistent and repeated matings performed in the Collier ET program, and this heifer is an example of why. Not only is this heifer extraordinary in her own right, look at the power of her full brother which sells as lot 73. Throw in strong EPD's and a note-worthy carcass scan exhibiting a big IMF and REA and you have a very complete individual.

Jezeabelle and Harmony teamed up her to provide a double shot of the 6/2 cow family line. Team that with the herd sire Logan and you have a very consistent genetic combination. Look at the long flowing lines of this cherry red heifer. She is very feminine and hard to fault. Don't forget to look at her strong IMF of 3.39.

Wow, look at the data, study the pedigree, and look at the heifer. CF 566/1 has big carcass numbers with a 1.33 REA/cwt and nearly a 4 IMF. Then look down at her pedigree and you will discover Crimson Clover, a very productive donor cow that was raising calves to the age of 16. Finally, take note of all the high quality traits offered by this outstanding individual. This is a complete package that's hard to fault.

Its easy to see that Logan continues to work on a variety of females and this heifer is no exception. Look down at the maternal granddam. Lincecum 183-5 does it again. That cow was a top tier producer in the Collier herd for 16 years and her daughters are doing the same. Snow Cloud genetics are known to be top milkers and with 183-5 in the pedigree, you know the maternal traits will be strong with this young prospect.

Take a look at this fancy, solid red Logan daughter going back to Painted Tiger on the bottom side via the 903 bull. Seven C cattle were bred for milk, hardiness, and conformation. When that is combined with the genetic consistency of Logan, the product is an exceptional mama cow in the making. Then look at the monster REA/cwt of 1.40. Don't let this heifer slip by!

Innovator was one of the high selling bulls at the 2008 Collier Farms Bull sale, because of his overall power, balance, and clean underline. Those same traits are evident in this well made young heifer going back to Scarlet's Pride breeding on top and Collier breeding on bottom. This extra fancy individual had a moderate birth weight and actual WW of 551 on 9/22/11 at six months of age. Then study her scan data; REA/cwt of 1.48 and %IMF of 3.27 prove that she is a top caliber female.

Here is the first look at Fusion in the 2012 offering and she doesn't disappoint. This super soggy heifer is a full sibling to two outstanding individuals that sold to Road House Ranch in last year's sale. Those individuals have gone on to produce two exciting young heifer calves and display the beautiful udder typical of Denim Phantom daughters. Look at the broodiness and capacity in this young heifer and you will find a real mama cow in the making.

Just like the lot 10 heifer, this Denim Phantom daughter offers lots of maternal genetics and broodiness that we've come to expect from both Fusion and Denim Phantom. Study her lines, depth of body, feminine front and strong performance numbers and you will discover a very balanced offering in this young female.

One of the young upcoming sires in the Collier Farms program is CF 433/8, and here is one of his daughters. CF 433/8 brings in L2 and Oasis breeding along with 9112, a proven herd bull producer. This combination mated with V-Seven maternal genetics is a sure fire way to create both pretty and productive cattle. Just to verify this, look at the numbers. Big, honest EPD's and undeniably good scan data with a REA/cwt of 1.32 and IMF of 3.34 make for a profitable individual.

Dark red and polled genetics run strong in this double bred Xcite granddaughter. CF 701/1 also brings in the lines of Synergy and Painted Tiger. Imagine taking a female with this kind of color, design and bred in predictability and mating her with bulls like Logan, Vision, or Fusion. Its really hard to go wrong here especially when you consider a REA/cwt of 1.54 in the mix.

Tiger Joy has been a very big part of the recent successes at Collier Farms and this Deliverance daughter can produce the same kind of results for your operation. Deliverance brings in Classic Cotton and Mr. Coffee, and when mated to Painted Tiger and King Cotton, its hard to go wrong. This heifer is strong in her lines and built to be productive for years to come. Here is another heifer to use back with a Logan bred bull. You know it will work!

Take a long look at this super soggy made heifer by the 2008 high selling bull CF 653/7. Logan genetics mated well with Forty Four Magnum back on the 17/6 cow family. 17/6, or Alice as we called her, was a super heavy milking donor female that was used extensively as a maternal base builder for future generations of Collier cattle. This heifer is strong in every trait, from performance to design, she should be a real asset to truly progressive programs.

Only a few generations removed, one can see that Logan back on Painted Tiger bred cattle works extremely well. Oliver 020/0 was probably the strongest made, solid red Painted Tiger son produced to date. His daughters and granddaughter have continued to be top tier producers as is evident in this stout made young female. Look at the bone, straight top line, and big hip in this individual. It comes from years of breeding for this phenotype and style. She is ready to go out and make money.

This heifer is very similar to the type and style seen in lot 16, but from different bloodlines. 1835 has big herd bull strength on top with Tabasco and W35/1, the dam of the 2008 LOBBA champion bull. Then combine Wartrace and 318/4 on the bottom to bring in some vintage maternal genetics and you have a really balanced lot offered here. Real carcass performance is also available in this heavy muscled package. Look at the giant REA/cwt of 1.47 on this fancy female.

Coming from JSJ is a really classy young female bringing in the lines of Tabasco and Lady Legacy on top with the FULL SISTER to Logan on the bottom side. We know this genetic combination has worked over and over at Collier Farms and is repeated here in lot 18. This individual has everything breeders are looking for from big EPD's to impressive scan data, and a proven pedigree. This heifer brings a full buffet to the table, don't miss out.

Halepeska Beefmasters has been dedicated to producing not only attractive cattle, but solid functional cattle that come from productive pedigrees and are ready to go out and become profitable individuals for any operation. H 114 delivers these kinds of traits through impressive performance, great scan results, excellent color and design, and a proven pedigree. Look at the top and you will find Lady Legacy and Midas teamed up with 5502 on the bottom to produce the kind of cattle breeders come back for every year.

Solid red, big performance numbers, and Lady Legacy make this fancy young heifer hard to pass up. Not only is this heifer made right in her lines and style, she also brings in strong maternal genetics on top and bottom that are sure to make this heifer a valuable asset to any breeding program. This heifer has it all, from her massive 1.45 REA/cwt to strong WW numbers, she's hard to fault. Go put her to work for you.

Check out the pedigree and performance on this Logan daughter out of Infinite Madam. Her Ultrasound results include an actual REA of 11.37, and REA/cwt of 1.28, and an IMF of 4.51 at 334 days of age. Not only is she super deep sided, heavy muscled, and well bred, she is polled as well. KC Beefmasters is a whole herd reporting member and Brucellosis and TB certified free herd.

Look at the size, volume, and growth capacity in this big stout Anderson bred female. This heifer could be the longest bodied, biggest hipped heifer in the entire offering. Her grandsire, Sralla's Success, was known for producing this type and style of cattle as evident in his 2008 LOBBA champion son. 7C 101/1 had a yearling WDA of 2.4 lbs. and adjusted 365 of over 900. Couple this with big IMF and REA numbers, and you have a real performance animal with proven bloodlines top and bottom.

Females like this don't come often and to sell one like CF 403/0 is a true sacrifice made toward the dedication of offering you our customer only the best. CF 403/0 is truly a real donor prospect that brings in the matriarch Tiger Baby on bottom and our most proven herd sire Logan on top. Study the overall depth of body, rib capacity, beautiful correct lines, and feminine brood cow style of this tremendous individual. She is solid red, royally bred, performance proven through individual weights, EPS's and ultrasound scan. Here is a female on which to build an entire program around. You can't put a price on this kind of package. Sells 100% Guaranteed!

Just as hard to let go, are Logan x Penelope daughters like this one. Take time to stare at the femininity exhibited in CF 500/0. Its this maternal power provided through Penelope that keeps producing these amazing individuals like Vision and all the other full siblings we have offered in the past. This heifer is arguably one of the most fancy fronted and well built animals in the offering. Then throw in strong performance and proven production to produce a true donor prospect that is hard to find.

Logan on Tiger Joy has been a mainstay mating within the Collier Farms ET program because of the high quality offspring produced like this super soggy female. CF 495/0 is solid dark red, deep bodied and square made. She has the bone structure, phenotype and true Beefmaster style that put the breed on the beef industry map. Study her numbers and the completeness offered here in lot 25.

Logan on Dusty Cotton has been one of the most consistent and prolific matings within our ET program. In the 2010 Legacy sale, a full brother to this gorgeous heifer was the high selling lot at \$15,000. Since that time several full brothers and sisters to lot 26 have sold extremely well and gone on to produce for their buyers even better. CF 494/0 is beautifully designed and has the scan data and EPD's to support her productive value. Throw in some Classic Cotton and Miss Dusty on the bottom to help guarantee quality offspring.

To date, Jesse has been one of our better kept secrets, but we can't hide him any more. Purchased 2 years ago from Timber Rigde, we acquired Logan's full brother, Jesse, to fill his role as a natural sire at the ranch. As expected, Jesse has performed brilliantly by producing progeny such as this impressive pick of super fancy open heifers. The dam of 27A is now a donor in our ET program because of her production and strong maternal background. Both Sunshine and Rosebud were highly productive cows that out-milked any others in the herd.

Just as fancy and powerful as the A heifer, Lot 27 B has everything a cowman could want on the bottom side with Jungle Ranger and Painted Cloud. Those two lines have produced some of the most fertile, long lasting, and heavy milking cows at Collier Farms. In addition, her dam is probably the easiest fleshing cow on the ranch. Then look at her high IMF and strong REA, and you will find a heifer that's balanced throughout.

Have your Pie and eat it too! This little Cherry Pie daughter brings in a great maternal lineage with Sugar Pie and Q Tee Pie on the bottom. Look at the smooth lines and solid bone structure on this true beef type female. With good performance data, beautiful design, and proven maternal genetics, this Jesse daughter is one to take to the house.

Na Na Lee is an outstanding, very gentle, dark red Logan daughter out of KC Beefmasters' Synergy daughter, Cherry Lee. She had a WW of 609, a YW of 890, and a REA of over 10 inches. This heifer was halter broke and shown in JBBA events. She is ready to breed and can be shown if desired. KC Beefmasters is WHR member and certified Brucellosis and TB free herd.

Purchased in the first Collier Legacy Sale in 2008, Tabasco Legacy has gone on to produce some of the best cattle offered in both this year's and lasts Advantage sales. JSJ has selected for proven maternal genetics and used Tabasco Legacy to produce females with design, pedigree, and performance. These cattle are super gentle and guaranteed.

Tabasco Legacy and Sugar Lady really teamed up well in this fancy young female. Sugar Lady brings in maternal greats like Sugar Ann and Lady Tiger, then add in Lady Legacy on top for a trifecta of awesome mama cows. Don't overlook the impressive EPD's, individual performance, and scan results on this complete offering. Imagine what this heifer could do bred back to a bull like Vision.

Any time you can get some Victor's Sister and Silk Stockings in the mix with a quality heifer like this one, do it. Legacy Satin brings in several of the breed's great maternal lines as well as proven herd sires like Cavalier, Mr. Coffee, Sir Kiffer, and Red Tiger. This beautiful heifer has strong EPD's, good scan data, and an abundance of style and conformational correctness that could work for any program.

We started this year's bred heifer offering with one of the most balanced packages in the sale. Study the smooth muscle, femininity, udder design, and class brought by Lot 32. Then study her pedigree, Logan and Tiger's Cotton. Like this heifer, Tiger's Cotton was a moderate framed cow that was a big time producer. She produced natural and embryo progeny to the age of 17 and still maintained her weight, udder quality, and fertility. She is the dam of our Mesquite Red bull, and several high selling individuals. AI to Fusion c907807 on 12/16/11 and cleaned up with P39, c993484.

Tiger Whisper speaks volumes in this outstanding pick lot of super classy bred heifers. We've seen over and over again what Tiger Whisper and Logan can do, here is just another example. This A lot to the pick is as an attractive a female as one could look at. She has an extra long, smooth front end, flat top line, correct leg set, and beautiful udder in the making. Study the lineage, the EPD's, and all the design traits evident in this package. Aled to Fusion c907807 on 12/16/11 and cleaned up with P39 c993484.

Just like the A lot, this female is super fancy fronted, and maybe a little bit soggy. Study the spring of rib and muscle shape exhibited by CF 195/0. Watch the female stroll around as she travels and appreciate her maternal look and style. This heifer has strong EPD's, good performance, and the bloodlines of Logan and Tiger Whisper to provide breeders a basis for which to make a very profitable decision when selecting 33B. Aled to Fusion c907807 on 12/16/11 and cleaned up with P39, c993484.

This attractive bred heifer is a one of a kind. Logan was mated to The Priola Cow in order to bring in the Farrah Lady line of cattle. CF 117/0 proves the consistent quality found in Logan daughters on a variety of breeding combinations. Mr.Coffee daughters are hard to find and this one is coupled with good numbers, an extra long body, Synergy, and Farrah Lady don't miss her. She was Aled to Fusion, c907807 on 12/16/11 and cleaned up with an Infinity son out of La Tee Da, P39 c993484.

Lot 35 exemplifies everything we've been working toward at Collier Farms, but this time comes from Advantage breeder, Triple B. Look at the length of body, perfect lines, beautiful udder, and feminine design. The sire of 3B 01 was the high selling bull at the first CF Bull sale in 2008 and brings in the lines of Logan and Painted Tiger from both 013 and 3/1. Then on bottom you will see a Fusion daughter that is currently in the Triple B ET program. Good numbers, program genetics, and perfect design make her a favorite of the sale. Aled to Vision c955655 on 12/16/11 and cleaned up with P39, c993484.

The Fusion on Red Farrah's Dream combination is one that you will see many times repeated in the Collier Farms ET program for one simple reason, it works. Look at the size and growth in this super feminine fronted individual. CF 106/0 has the body length, volume, and bone to add some real performance to your herd. Her dam, Red Farrah's Dream, was a high selling lot at the 2008 L2 sale and has been a top producer since we placed her in service. With the maternal power in Red Farrah's Dream and the performance of Fusion, this is a no miss. She was Aled to Vision c955655 on 12/16/11 and cleaned up with P39, c993484.

We are still nashing our teeth about letting this POLLED beauty go. CF 231/0 is the first calf from a beautiful Logan daughter out of a OO7 daughter, and back out of a Jungle Ranger daughter. It is evident the amount of program breeding we have established in this thick made, red doll. This is your opportunity to get a polled heifer with tons of bred in maternal power. Aled to Vision c955655 on 12/16/11 and cleaned up with P39, c993484.

Casey's 4B brought in two extra classy Tabasco daughters that are straight, thick, and smooth POLLED. This solid red female has a super feminine head and extended front end which is hard to fault. Study the squareness of hip, perfect leg set and big loin. This heifer had a tiny 61lb. birth weight, huge 635 weaning weight, a perfect 10 inch ribeye and 3.77 %IMF. She was AI bred to Vision c955655 on 12/3/11 and cleaned up with P39, c993484.

Just like her flushmate sister, 4B 004 is tremendously long bodied, correct made, and super feminine. She is smooth POLLED and brings in the maternal lines of Lady Victoria, Victoria's Secret, and Jungle Red. Look at the big performance data. Small birth weight, big weaning weight, impressive EPD's and scanned with a 4.77% IMF. This beauty is as Aled to Vision c955655 on 12/3/11 and cleaned up with P39, c993484.

Here's a doll with dark red coloring and a double dose of Painted Tiger! CF 336/0 is a moderate made heifer out of a moderate made donor in the CF program that is one of the easiest fleshing cows on the ranch. MM639 is an outstanding Tiger daughter out of our smooth polled 72L donor cow. This little prospect is a fourth generation ET product and ready to produce embryos herself. She was Aled to Fusion c907807 on 12/16/11 and cleaned up with P39, c993484.

Lot 43 brings in some throw back genetics on bottom with Circle Dot. This old productive line of cattle developed breed greats like Gladiator, and when paired with modern Logan genetics on top, you have a real quality base from which to build. This solid red female is very feminine, moderate in frame, and ready to go to work. She was Aled to Fusion c907807 on 12/16/11 and cleaned up with P39, c993484.

Take a look at these fancy Logan daughters. Logan wraps it up every time with a dark red color, straight top, thick and fancy style. This pick of heifers are coming out of one of the cornerstone donors from Collier Farms, Tiger Joy. Tiger Joy has made her mark on their breeding program and anytime you can get her genetics, do. These heifers are bred to French Connection, c960174 and is a sure bet, you be the judge and don't pass up this opportunity.

Just like the A heifer, lot 44B displays the consistency of Logan on Painted Tiger daughters. Tiger Joy continues to impress with dark red, well built progeny. Again, this female is was Aled to French Connection, c960174 on 9/30/11 and cleaned up with him as well. This is a pick in which you can't go wrong, so take them both.

Try and pick these two heifers apart. Logan's Legacy strikes again. Look at the conformation of these two heifers. They are straight topped, long hipped, heavy boned and extra fancy. They are the front pasture kind and go back to Tango and Logan. Look at the performance data and EPD's. There is no doubt they will go out in the pasture and perform. To top it of they were both Aled to French Connection c960174 on 7/20/11 and then cleaned up with him as well. Don't wait on the pick, only one may sell.

The 45B lot exhibits the same phenotypic quality and genetic merit. Logan's Legacy is again paired with Rumba and Tango to bring in a double dose of Little h 146. This heifer is U1,2 classified, has strong EPD's and solid individual performance data. She was Aled to French Connection, c960174 on 12/30/11 and cleaned up with him as well. Like we said with A, don't wait for this one to sell, she may not !

Look at this doll of a heifer. She is as gentle as they come, straight topped, and high performing. This heifer is out of Lyssy 105/764, he did it again, look at the predictability here. You can't find any faults in this heifer. This heifer has longevity all over her. Look at the perfect teat placement and udder design. She was Aled to Logan's Legacy, c948944 and cleaned up with a Maverick son c997560. Here is a sure bet on the calf in the belly. Lifetime Member, WHR.

105/764 does it again. She is red, straight topped, thick, and clean; what more could you want in a female? She goes back to Tango and Scarlett's Pride. You will see this genetic combination time and time again through our herd because its proven and works every time. She goes back to Lyssy 128/658 who is a cornerstone donor in the Lyssy program. This heifer is a sure bet on any bull, any color. She was Aled to Maverick c951166 on 7/20/11 and cleaned up with him as well.

This Integrity daughter has it all. Her half sister was the second high selling pair last year at this sale. She is straight topped, long sided, and deep ribbed. Here is a brood cow in the making, going back to Painted Tiger, Tango, and Scarlet's Pride. This heifer was Aled to Logan's Legacy c948944 and cleaned up with a Maverick son, c997560. Look at the scan data on this heifer and being bred to Logan's Legacy, she's surely making a great calf in the belly. She is as fancy as you can make a heifer, don't let this heifer slip past.

Check out this fancy Logan's Legacy daughter. She has Logan, Lady Legacy, Ranger's Pride, and Spartacus in her pedigree. Look at her EPD's and scan data. She is long-bodied, deep sided, and has tremendous spring of rib. Lot 49 was Aled to Maverick, c951166 on 9/16/11 and cleaned up with a Maverick son, c997560. This heifer is the cowman's kind, so don't hesitate.

Here is a super attractive heifer out of Lyssy's 105/764 sire. This heifer goes back to Tango on top and bottom. This heifer is heavy muscled, but still feminine. Heifers of this quality are not offered everyday and to top it all off, she was Aled to Maverick, c951166 on 9/16/11 and cleaned up with a Maverick son, c997560. This cross is a sure bet wrapped up with performance and predictability. With Maverick's low birth weight, turn her out and watch her perform.

Here's another 105/764 daughter; look at the consistency. This heifer had a birth weight of 70lbs. and a weaning weight of 609. If you're looking to add some performance to your herd, you can't go wrong here. She is moderate framed, thick, deep muscled, and Aled to Maverick, c951166 on 9/16/11 and cleaned up with a Maverick son, c997560.

Here's another Logan's Legacy daughter we hat to let go of. This heifer ties it all together with a straight top, deep muscle, and nice udder. Logan's Legacy daughters are heavy milking and have impeccable udders. She is out of a top Tango daughter in our herd. Look at her high EPD's and to top it off she was Aled to Maverick, c951166 on 7/20/11 and cleaned up with him as well. Don't pass this jewel up. Lifetime member, WHR.

Logan back on Tiger's Cotton is at work again in this attractive young pair. Just like the heifer we started the breds with, this young pair takes the lead amongst of super set of young cows. Tiger's Cotton brings in a 17 year production history, Logan delivers superior herd bull power, and the pretty little heifer at side gives buyers something to take home and expand their herd with. Study the depth of body, perfect milk factory, and coupon on the side of this premier lot.

Logan daughter seem to be working in the pasture just as well as the sell in the ring. This big broody cow is only a first calf heifer with a super stout red heifer calf at side. This female is very attractive in her lines, deep sided, and has an excellent teat placement. Her heifer calf is by Polled Fusion and will be an asset in her own right. Lot 54 also brings in Double J 411/6 on the bottom with Davidson 603.

Lot 55 comes from a long line of proven producers and maternal greats. Her dam, Miss Tabasco 934/4 is now a donor in the Collier ET program because of her quality production and the proven history of her dam Sunshine and Rosebud. When you have the opportunity to add a female with this kind of maternal genetics by one of the breed's leading herd sires, don't miss it. Her bull calf is by Fused Silk, which also brings in Silk Stocking and Phantom's Diamond into the mix.

Big performance, solid EPD's and King's Lady provide all the reason one would need to make a purchasing decision here. OO7 was mated with King's Lady for the sole purpose of producing powerful mama cows for the CF brood herd. The dam of 967/9 is such a cow. With the foundation of Logan and proven CF brood cows, breeders can take this female and prove up their own herd bull or breed to other great lines of cattle.

It seems every year that there is a sleeper in the sale, and this young cow may just be the one. She is a tick younger and greener than some of the other pairs in the offering, but brings as much or more to the table than first meets the eye. Study her design and you will find her hard to fault. Then look at the pedigree and performance. She combines Logan with Tabasco and the great Crimson Clover donor cow. Her super clean bull calf is by Fusion and show what kind of color, design, and type of progeny are possible in this young cow.

The only thing better than a Logan daughter is a Fusion daughter bred to Logan. Fusion continues to produce highly maternal females that go out and raise calves that are nearly as big as they are. Fusion daughters like this are known for their milking ability, early fertility, and great dispositions. Take the bull calf at side and put him back in the Collier bull test and sale and you may pay for the whole package.

Tabasco, Natural Selection, and Synergy are all in the genetic lineage of this super feminine young cow. Study the clean underline, pretty udder, and long flat top of Halepeska 980. She was AI bred to Classic Cotton and produced the cleanest underlined bull calf you will find by him. The cow is proven, the calf is a true prospect, and the market is right to turn genetics and individuals like these into real profit centers. There's no way to go wrong here.

G Four Ranch is making their production debut with this pretty young pair. Logan's Legacy worked well back on Pearl which goes back to Phantom Warrior on the bottom. This young cow was such a heavy milker, that the calf had a hard time keeping up when it was younger. Now, that calf has bloomed into a beautiful young Vision daughter with her whole life ahead. Feminine, deep, and smooth describe the package, now its up to the buyer to mate her right and turn her into a profitable asset.

Solid red Cavalier daughters like this one are hard to find. Sweet Cavalier Dreams is by KC's Synergy donor and out of Farrah Lady. Her carcass ultrasound results included a REA of 11.44, IMF of 3.4%, and she weighed 970 at only 381 days of age. She has a beautiful young Vision heifer calf at side which will provide two outstanding individuals to add to your herd. WHR, Brucellosis and TB certified free herd.

Here's just a little different combination of the same genetics that have worked at Collier Farms for year. Lady Legacy was mated with Midas to create the sire of this fancy young cow. Then on bottom, one will find Tabasco, Painted Cloud and Linecum 49-4, the dam of 819/0. CF 723/9 represents the fourth generation of maternal greats within the CF herd that have been top producers for years. Now the fifth generation is at side, and what a dandy she is. This is truly 2 great females in one prime time offering.

Chapman 84/0 brings a double dose of Painted Tiger, Cavalier, and red proven Beefmaster genetics to the sale offering. This superior young cow displays a perfect udder, conformational correctness, and the ability to produce top of the line offspring. Her pretty red heifer calf is out of a Logan x Tiger Mania son which was bred and sold in the CF performance bull sale. Take the cow home and keep mating her to Logan genetics, then mate the heifer to Fusion and watch the production begin.

Double bred Painted Tiger females provide breeders with the opportunity to work off a very consistent, proven background, and this heifer is no different. 85/0 is super soggy, heavy boned, and easy fleshing. She is due to calve around sale time to an impressive young herd sire by Captain Lucey and the great King's Lady donor cow at Collier Farms.

Selected for this event over a year ago, these top females from Chapman Beefmasters continue to impress. Chapman 87/0 brings in Painted Tiger on top and Havana on the bottom and combines those proven lines with strong EPD's and visual appeal. Study the design, foot placement, femininity, and other profitable traits exhibited here and you will find an offering hard to pass.

Red, well made females are always in style and this Painted Tiger granddaughter is no different. Look at the fleshing ease, correctness, balance, and pretty udder in the making on 83/0. She is due to calve around sale time to CF 489/9, a Captain Lucey son out of King's Lady. This type of breeding has been successful in many programs throughout the breed, so be sure to include it in yours.

This may be one of the most attractive young cows in the entire offering. 75/0 is the ideal Beefmaster cow for today's industry. She is very feminine in style, moderate in frame, good milking, and bred to perform. Additionally she is solid red and displays a nicely bladed underline. To compliment the cow, she has offered a stout young bull calf by CF 620/9, a Logan son out of the flush mate sister to Bengal Baby, Tiger Mainia.

Wow, is all we can say about this package. Look at this first calf pair with a Maverick daughter at side. These 105/764 daughters will do it every time. Look at the quality and functionality of this young female. She has a beautiful udder and thick top. She is out of a Midas daughter and goes back to Scarlet's Pride. Look at the outstanding heifer at side. She is sure to win a show. Its not every day that you find a package this good. Don't miss the opportunity to take a cow and calf home that will rise to the top of your herd.

At Collier Farms, we find that great young cows are no accident when looking back upon the lineage from which they come. CF 353/0 could be the most feminine, yet broody cow of the offering, and her mother is the same way. Miss Magic Coffee has been a very consistent producer of quality for the ranch and is making that available to you the buyer. Her heifer calf is by Fused Silk, which brings in Silk Stocking to add to the maternal treasure chest found in lot 70.

CF 365/0 rounds out the pair category for this year's offering but doesn't give up anything in quality or consistency. She is big bodied, correct made, and plenty powerful. Her sire was a LOBBA top ten bull, her maternal grandsire was a LOBBA Reserve Champion bull, and she goes way back to Jungle Ranger on bottom. When you consider that she additionally has a smart little red heifer at side by Fused Silk, you will quickly realize that quality runs deep at the 2012 Advantage Sale.

Try to define what a true herd sire is and then look at how it applies to CF 312/0. He checks out across the list. Dark red, check, royally bred, check, gentle disposition, check, well made, check, good performance, check, and 100 % guaranteed, double check. In reality, breeders want consistent quality from their bull and that leads to profitability. With Logan and Bengal Baby, that is fully covered. We have shown what the heifers can do, his brother was one of the top bulls in Live Oak, and this young prospect is a culmination of what makes Beefmasters great. Use him anyway you want and you will be glad you did.

We all know greats produce greats and CF 334/0 is proof of that. His sire Logan is arguably the number one producer of quality herd bulls currently in the breed. His dam not only provides us with countless quality females like lot 3, but also produced the high selling bull in last year's CF bull sale. Look at the massive rib shape, solid dark red color, good angled underline, and thickness of hip. Genetics, performance, and design are all wrapped up in one tremendous herd sire prospect.

Rafter S 6/10 proves that Logan genetics will consistently produce the cut, style, and muscling needed in today's Beefmaster cattle. Innovator has proven he can produce top tier individuals like this year's Houston bred heifer Champion, the high selling bred heifer at the Buccanneer Classic and several show heifers that have been winning their classes all over. This young herd bull prospect has the same potential and he is scurred polled as well. Study the moderate frame, giant rear end, and fluid movement of this top young bull.

Logan and Tiger Whisper is a combination which has been replicated time and again because of the consistent quality the mating produces. Look at lots 33A & B and you will see 2 perfect examples of what to expect. Tiger Whisper has produced a large number of females that we have offered in our past Legacy and Advantage Sales as well as top end show heifers, doing quite well on several different show strings. Logan is a powerhouse producers of not only pretty females, but more notably, powerhouse bull prospects. Here is an easy way to get into the Collier Farms Advantage program or add some predictable genetics to your herd.

4 Frozen Embryos - Vision x Miss Tabasco

Embryo

Sire: Vision C955655 DNA: 531691A PV
Dam: Miss Tabasco 934/4 c DNA: 495485A

As shown in several of the sale lots, Vision is making his mark on the Collier Farms program as well as the Beefmaster breed. He is proven to add the body, rib-shape, length of top, and overall muscling the breed has been looking for. Then study what he can do when mated to Tabasco daughters. Lots 2A, 2E, and 2F are perfect examples of why this type of mating works. CF 934/4 brings in the best of Tabasco genetics because she is out of a tremendous cow family line including Sunshine and Rosebud. This line of mama cows will raise big strong calves in tough conditions, and breed back every year. This is why CF 934/4 is in the program. Other daughters of hers sell as lots 27A and 55.

Embryos are stored at Ovagenix in College Station, TX and are ready for Direct Transfer at buyer's expense.

4 Frozen Embryos - Fusion x Logan Joy

Embryo

Sire: Fusion, c907807 DNA: US3000510PV
Dam: Logan Joy CF 812/8 (157), c972462 DNA: US4019201PV

Fusion is one of the most versatile semen bulls currently in the breed. He offers the opportunity to produce low birth weight calves, that are easy fleshing, gentle, solid red, and extra fancy. When mated with consistent producing Logan daughters like Logan Joy, the results are awesome. This same combination produced a bull in the 2011 Collier Farms bull sale, which sold for \$15,500. Logan Joy is a Tiger Joy daughter by Logan, that is super correct, solid dark red, and extra clean underlined. Logan x Tiger Joy combinations can be seen in this sale as lots 25, 44A, and 44B. In reverse you can see the Logan on Fusion combination in lots 8 and 35.

Embryos are stored at Ovagenix in College Station, TX and are ready for Direct Transfer at buyer's expense.

*Dam ID on container may read 157/7, same cow.

Logan has proven time and again that he is the most consistent producer of high quality, clean sheathed bulls and extra fancy females in the breed. His sons continue to top the Collier Farms bull sale and other bull sales in the breed, while his daughters are winning futurities, shows, and producing in the pasture. Logan has produced progeny in 10 countries and 4 continents around the globe. He is a true U 1,2 classified Typesetter herdsire. Logan is the foundation for the future, but his semen will not be available at this price forever. After this year's Advantage Sale, Logan semen will increase to \$100 per unit. Take ADVANTAGE of this opportunity to stock up on Logan semen at this lower price!

Fusion offers breeders the ability to breed a high profile producer of show quality females and high selling herd bulls to both virgin heifers and mature brood cows. He is currently the lowest birth weight bull in the breed. He also produces a higher percentage of heifers than bulls on average and will really put the milk in his daughters. Because he is an outcross potential to most other popular lines and extremely low birth weight, Fusion is the perfect bull in which to breed every virgin heifer in your program. Fusion is a great way to add a moderate framed, easy fleshing, RED herd bull to your AI program.

Vision is the ultimate example of the kind of quality and consistency produced from Logan and Penelope. That mating alone has pushed the Collier Farms program as far forward as any other produced to date. Vision was under very close watch during his growth and development stages and even as his first calves began to hit the ground. Now after two years of proven production, the final evaluation is in. Vision 905 is everything we expected and more. His progeny are easy calving, vigorous at birth, extra thick yet moderate, and grow out to be easy fleshing eye-catchers themselves. Vision will put the added spring of rib, extended front, and pop in the rear end that today's breeders need. Vision has stepped out of his father's shadow and is poised to carry the Collier Farms program into the future. Now is the time to think ahead, now is the time to have a Vision.

The best way to ensure your program will be progressive in the future is to breed a bull with a proven past and build from him. Collier Farms continues to breed Tabasco to create those foundation individuals from which we can stack other program sires to create the kind of consistency and type buyers have come to expect. Tabasco will straighten lines, flatten hips, add bone, and put a fancy front on his offspring. Superior individuals are the product of bulls like Tabasco. Think of the ways to incorporate Tabasco into your program. Tabasco semen will increase to \$100 per unit after this years Advantage Sale, so get it now while its still \$75.

Consistent quality is the name of the game when it comes to productivity and profitability. Few of the semen sires available to today's breeders offer the kind of bred in predictability offered by Logan's Legacy. Study the proven lineage and his product on the ground. Logan's Legacy takes the guess work out of breeding cattle. He is smooth, balanced, clean sheathed, and full of natural muscling wrapped up in a red package. He is the kind of bull that could be bred to the entire herd with great success. Just think of the paternal and maternal power available in a single straw of Logan's Legacy.

Semen is \$25/straw with 10 straw minimum.
 Semen certificate \$50 each.

Muscle and power in a moderate, correct, and classy package characterize Maverick, one of the most exciting new herdsires to come along in the breed. Like all highly productive herdsires, Maverick is the result of a long line of proven genetics. This impressive individual combines the traditional style and eye appeal of his strong maternal background with high performance traits bred into his paternal lineage. Maverick blends the best of both pedigree and performance genetics into a modern package ready to take the breed into the future. His calves are low birth weight, square-made, extra thick, and scan at the top of their contemporary groups. In addition, they are highly marketable, as the first Maverick son offered brought an outstanding \$12,500. Push your program to excel with Maverick. Semen is \$25/straw with 10 straw minimum. Semen certificate \$50 each.
